How to Draw a Dachshund

1. Draw a pointed oval shape for the Dachshund's head.

2. Add a filled in circle for the eye (don't forget to include a small white spot for the highlight!), a filled in triangle for the nose, and a rounded rectangle for the ear.
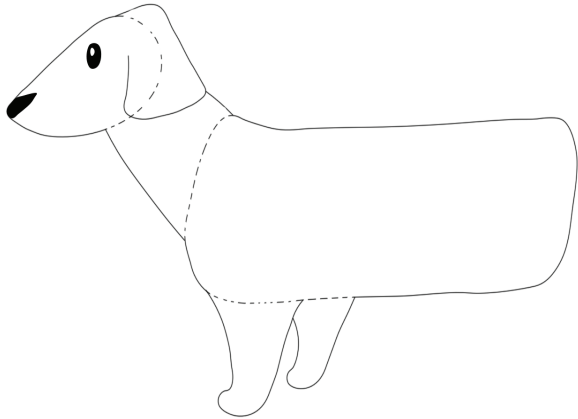

Erase dotted line.

3. Add two lines for the neck.

4. Draw a looooong rounded rectangle for your Dachshund's body!

5. Add the front legs. The legs are a little short compared to the body!

Remember to erase the areas that have dotted lines.

6. Almost done! Draw two back legs, again erasing the areas where you see dotted lines.

7. Last but not least, add a tail.

You can also add any other details you like at this step - a collar, a leash, or any markings. You can also color your Dachshund at this stage! Get creative!
